Bali, Indonesia

Junior Software Engineer who enjoys turning real industry problems into working systems, using the resources at hand to get things done. I'm a curious and flexible learner, happy to pick up whatever technology a project calls for, and ready to go deep when a role demands it. I'm especially drawn to robotics, microcontrollers, and mobile development, and I'm also fascinated by how machines and mechanical systems work. I bring strong communication, leadership, and collaboration skills.

Education

Politeknik Negeri Bali
Software Engineering | GPA: 3.93 / 4.00 | Aug 2021 - Oct 2025
Built a solid foundation in software development: Java OOP and desktop apps (NetBeans), web development (HTML, CSS, PHP, Bootstrap, CodeIgniter 3), databases (MySQL Workbench), machine learning (Python, Jupyter), and networking fundamentals (Cisco Packet Tracer).

Participant in Bangkit Academy 2023
Mobile Development Cohort | Aug 2023 - Jan 2024
Learned Android development with Kotlin and Jetpack Compose using Android Studio. As the mobile developer, collaborated with machine learning and cloud computing teams on a capstone project, building an app that detects AI-generated images.

Campus Robotics Organization
Secretary | Aug 2021 - Aug 2022
Active member in the IoT division, building projects with C++ and Arduino Uno.

Working Experiences

PT. Sentral Retailindo Dewata (Pepito Supermarket)
IT Developer, Staff | Oct 2025 - present

- I work as a Mobile and Web Developer, handling the full development cycle from requirements and design to deployment, while also managing vendor-built apps and supporting core systems across departments.
- I took over a vendor-built mobile project and independently built store operation apps, while also delivering internal web systems end to end, from design and data preparation to API development.
- I use Flutter and Android Studio with Firebase FCM for mobile, Laravel and Vue.js for web, and SQL Server, PostgreSQL, and Amazon S3, deployed on Windows and Linux servers.

PT.Solusi Anak Sakti (Djoin)
Software Engineer, Internship | Aug 2024 – Feb 2025

- Contributed to developing basic features of the company's system using Laravel, Laravel Admin, and Laravel Filament. Reviewed unit tests with test coverage analysis and explored Cloudflare to broaden my technical knowledge.

Skills

- **Language:** Bahasa Indonesia (Native), English (Basic)
- **Technical Skills:** Experienced working with the following tools and languages: Flutter, Kotlin, Android Studio, SQL Server, PostgreSQL, Git, Laravel, Vue.js, Agentic AI.
- **Soft Skill :** Teamwork, Communication, Quick Adaptation, Growth Mindset, Problem Solving.
